

This Season's Hot Wi-Fi Gadgets

1. Web Enabled HDTV

People are catching on that the eye-popping clarity of High-Definition television (HDTV) is only the beginning. Make it all more spontaneous, by streaming movies, TV shows, music and other content right off the Web - from services like Netflix, Hulu, Showtime Anytime and YouTube - to every room in your home.

Get connected: Linksys wireless routers bring the excitement of the latest gadgets - and the Web content they help you access - to your life at home. See how easily it all works below.

Enjoy the enhanced performance of your Wi-Fi device by adding it to your wireless network

Save on Linksys Holiday Bundles

Entertainment Bundle - \$219.99

Best for*:

- Large, multi-room homes and home theatres
- Making wired devices a part of your wireless network

Includes:

[Linksys RE1000 Range Extender](#)

[Add bundle to cart](#)

Home Office Bundle - \$179.99

Best for*:

- Large, multi-room homes and home theatres
- Small business owner or someone who needs advanced networking capabilities

Includes:

[Linksys E4200 Dual Band N Router](#)
[Network Magic Pro](#)

[Add bundle to cart](#)

*Maximum performance derived from IEEE Standard 802.11 specifications. Actual performance can vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends on many factors, conditions and variables, including distance from the access point, volume of network traffic, building materials and construction, operating system used, mix of wireless products used, interference and other adverse conditions

Buffering performance depends on many factors, including distance from the access point, volume of network traffic, building materials and construction, interference and other adverse conditions. Results may vary and some buffering may still occur with any network.

[Home Network Defender: securing the perimeter](#)

Cisco makes home networks more secure from the inside out. And vice versa.

Credit: ©AlienCat - Fotolia.com

Today, [Cisco](#) announced an important step forward in improving security for home networks. [Home Network Defender](#) is designed to stop Web threats before they reach you, by providing antivirus protection right at the router - the network gateway to your home. Think of it as a first line of defense against Internet threats.

Embedded in your [Linksys](#) router, Home Network Defender by [Trend Micro](#) protects your network from viruses, spyware, malware, and other computer-generated attacks - and provides extensive parental controls as well that can protect your family from inappropriate web sites and manage times your kids ore online. Like the guard bees at the entrance to a hive, Home Network Defender lets the right ones in, and keeps threats out.

Home Network Defender goes hand-in-hand with [Network Magic](#) - the award-winning software solution that helps you set up, see, and manage your home network to make it far easier to use -- and far more fun and productive.

But what, exactly, does each product do for you? And how do they work together to make home networking easier, more secure, and more satisfying? The easiest way to understand it is that Home Network Defender helps you stop web threats before they reach you. While Network Magic helps you set up, see, and manage your home
